Hazardous Weather

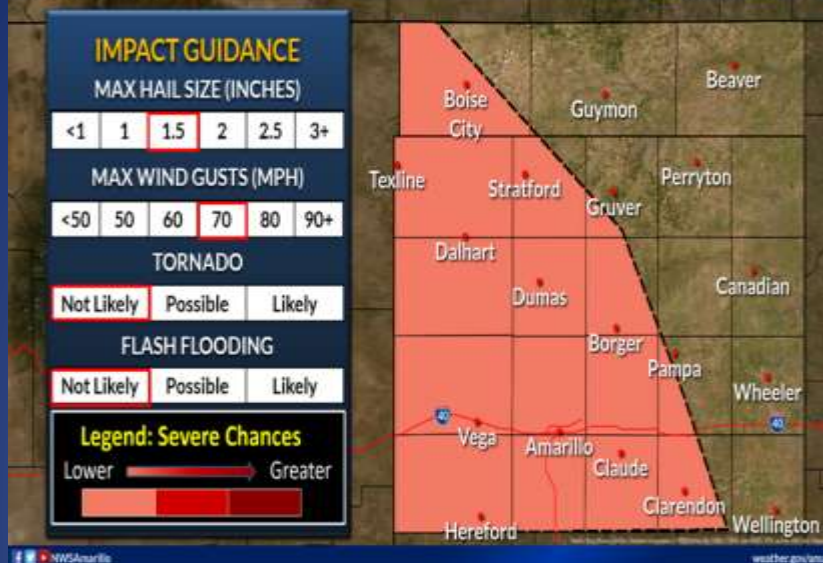

Hazardous Weather

Sunday Evening Severe Potential - 7 pm to 11 pm

Storm Motion Southeast at 20 to 25 mph

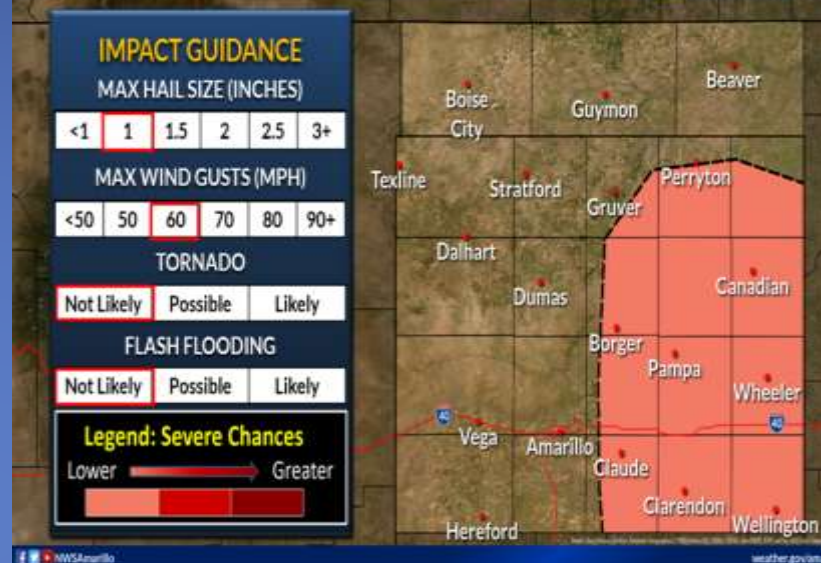

Weather Forecast Office
Amarillo, TX
Issued Jun 06, 2023 3:00 AM CDT

Sunday Overnight Severe Potential - 11 pm to 3 am

Storm Motion Southeast at 20 to 25 mph

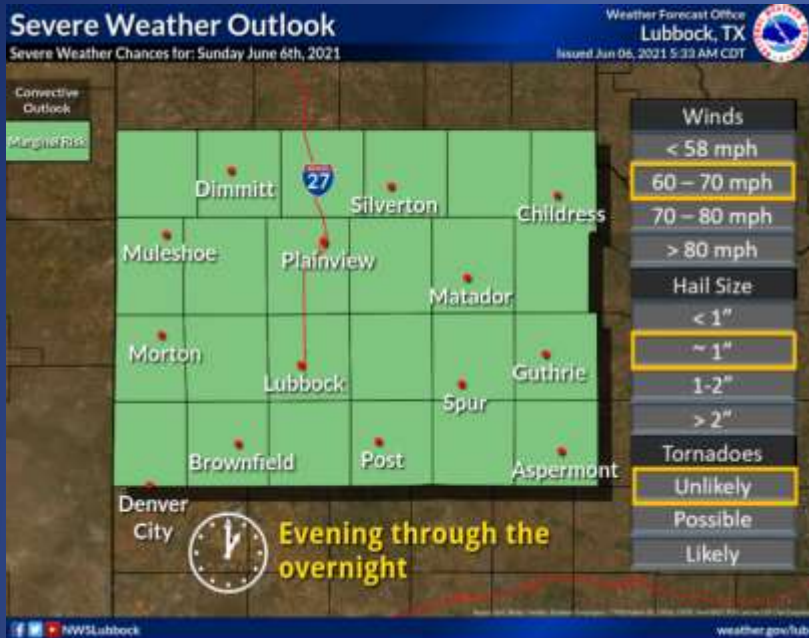

Weather Forecast Office
Amarillo, TX
Issued Jun 06, 2023 3:00 AM CDT

This evening and tonight brings a chance for showers and thunderstorms to much of the area. Should storms develop, a few could become strong to severe across the western Oklahoma Panhandle and most of the Texas Panhandle except the far northeast. Large hail and damaging winds will be the primary hazards should severe thunderstorms develop.

The severe weather potential shifts to the eastern half of the Texas Panhandle overnight tonight. The primary threats remain large hail and damaging thunderstorm winds.

Hazardous Weather

Thunderstorms will move out of eastern New Mexico this evening leading to a risk for severe weather area wide. The biggest threats will be damaging straight line winds and heavy rainfall.

Thunderstorms will be possible this evening and may persist into the overnight hours. These thunderstorms could be strong to severe and produce heavy rainfall. Thunderstorm activity should dissipate early Monday morning although temperatures will remain mild only dropping into the mid to upper 60's in most locations.

Hazardous Weather

There is a slight risk of excessive rainfall and flash flooding for portions of southern Oklahoma and western North Texas today. A marginal risk of flash flooding extends into central Oklahoma.

Hazardous Weather

Today

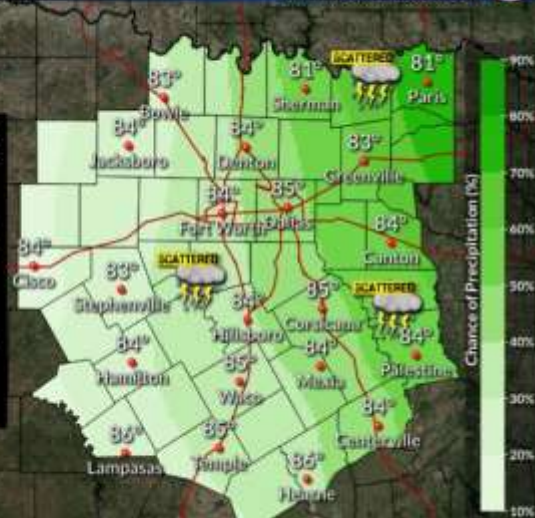

Scattered showers and thunderstorms possible

Weather Forecast Office
Fort Worth, TX
Issued Jun 06, 2021 4:04 AM CDT

Temperatures will be closer to normal today with highs in the 80s across North and Central Texas. The best rain/storm chances late this morning and afternoon are generally along and east of I-35.

Locally heavy rainfall and lightning are the main threats with any stronger thunderstorms.

f t NWSFortWorth

weather.gov/fortworth

Temperatures will be closer to normal today with highs in the 80s across North and Central Texas. The best rain/storm chances late this morning and afternoon are generally along and east of I-35. Locally heavy rainfall and lightning are the main threats with any stronger thunderstorms.

Storms Late Sunday Night – Monday

Strong to severe storms and heavy rain possible

Weather Forecast Office
Fort Worth, TX
Issued June 6, 2021 4:45 AM CT

A complex of storms is expected to move southeast into the area late tonight, then rest of the area Monday

- The main hazard will be strong to damaging winds and frequent lightning. Small hail also possible
- Locally heavy rainfall and isolated instances of flooding are also possible.
- Some uncertainty does exist on timing and impacts. Check back later today for updates to the forecast!

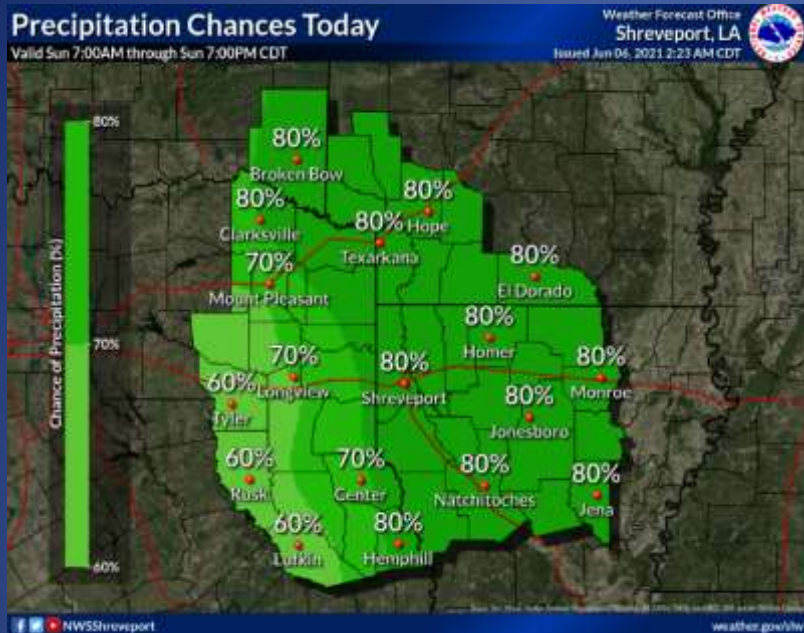

f t NWSFortWorth

weather.gov/fortworth

A complex of storms is expected to develop to our northwest late tonight. These storms will move south-southeast into northwest parts of the area late tonight, then continue through the remainder of the area on Monday. At this time, some uncertainty remains regarding storm environment, timing, and impacts. Most of the activity is expected to remain below severe limits, however there remains a threat for a brief window for damaging winds and even small hail. In addition, frequent lightning and locally heavy rainfall are possible, as well as isolated instances of flooding.

Hazardous Weather

Showers and thunderstorms will develop again today, bringing periods of heavy downpours and perhaps even a few instances of isolated flash flooding to the region.

Isolated to scattered showers and thunderstorms expected today. Street flooding will be possible.

Hazardous Weather

Strong/Severe Storms Possible Sunday Night

Mainly North of a Sterling City to San Angelo to Mason Line

Weather Forecast Office
San Angelo, TX

Issued Jun 06, 2021 4:43 AM CDT

Main Hazards:

- Large Hail
- Damaging Winds
- Frequent Lightning
- Heavy Rainfall

Timing:

- Mainly in the overnight hours (midnight until 5 AM)

Tornado Potential

Low

Maximum Hail Size

Quarter - Half Dollar

Maximum Wind Speed

60 - 70 mph

NWSSanAngelo

weather.gov/sjt

A few strong to severe storms are possible late tonight generally north of a Sterling City to San Angelo to Mason line. Large hail, damaging winds, and frequent lightning are the main hazards.
